Journal of Food Engineering **14** (1991) 337–338

CONTENTS OF VOLUME 14

Number 1

Mathematical Modelling of the Thawing Process 1
IRENE LIND (Sweden)

Optimization of the Thermal Processing of Conduction-Heated Canned Foods: Study of Several Objective Functions 25
J. R. BANGA, R. I. PEREZ-MARTIN, J. M. GALLARDO & J. J. CASARES (Spain)

Rheology of the Paste from Gelatinization by Extrusion During the Production of Third-Generation Snacks 53
G. J. M. VAN LAARHOVEN & G. STAAL (The Netherlands)

Evaluation of the Precision of the Modified Fitch Method for Thermal Conductivity Measurement of Foods 71
MD. SHAFIUR RAHMAN (Australia)

Number 2

Inactivation of Thermostable α-Amylase during Drying 83
G. MEERDINK & K. VAN'T RIET (The Netherlands)

Modelling of the Continuous High Shear Rate Conching Process for Chocolate 103
K. FRANKE & H.-D. TSCHEUSCHNER (FRG)

Changes in Rheological Properties and Particle-Size Distribution During the Manufacture of 'Xixona Turron' 117
A. CHIRALT, M. J. GALOTTO & P. FITO (Spain)

Hydrocyclones for Processing Food Liquids 129
LEV A. ROVINSKY (USSR)

A Model for Unsteady State Drainage of a Static Foam 139
GANESAN NARSIMHAN (USA)

Number 3

Simultaneous Gas Diffusion and Chemical Reaction in Foods Stored in Modified Atmospheres 167
JATAL D. MANNAPPERUMA, R. PAUL SINGH & MARTA E. MONTERO (USA)

Dynamic Simulation of a Nonlinear Model of a Double Effect Evaporator . . 185
T. R. RUMSEY, C. H. RUNYON & K. L. McCARTHY (USA)

Simultaneous Estimation of Heat and Mass Transfer Coefficients in Externally Controlled Drying. 203
Z. B. MAROULIS, C. T. KIRANOUDIS & D. MARINOS-KOURIS (Greece)

Journal of Food Engineering (**14**) (1991) — © 1991 Elsevier Science Publishers Ltd, England. Printed in Great Britain

Residence Time Distributions in Extrusion-Cooking: Part 7 — Modelling of a Corotating, Twin-Screw Extruder Fed with Maize Grits 241
T. JAGER, D. J. VAN ZUILICHEM, J. G. DE SWART & K. VAN'T RIET (The Netherlands)

Book Reviews 257

Number 4

Drying Characteristics of Tomatoes 259
M. N. A. HAWLADER, M. S. UDDIN, J. C. HO & A. B. W. TENG (Singapore)

Moisture Sorption Isotherm Characteristics of Potatoes at Four Temperatures 269
N. WANG & J. G. BRENAN (UK)

Bruise Development and Fruit Response of Pear (cv. 'Blanquilla') under Impact Conditions 289
LEONOR RODRIGUEZ SINOBAS, MARGARITA RUIZ-ALTISENT & JOSE LUIS DE LA PLAZA PEREZ (Spain)

Sorption Isotherms of Mixed Minced Meat, Dough, and Bread Crust 303
IRENE LINE & CHRISTINA RASK (Sweden)

Determination of Diffusion Coefficients in Volume-Changing Systems — Application in the Case of Potato Drying 317
V. GEKAS & I. LAMBERG (Sweden)

Research Note

Net Isosteric Heat of Sorption in Dried Fruits 327
E. TSAMI (Greece)
